DV01 32, said differently, is "how many TICS are in a basis point?".

Example, If **ZN** moves 1~basis point, then, it's moved 2.51 tics (Today, 12/01/08, the value in the box is 2.51).

Since ZN trades in half tics, then, 5.03 boxes = 1 basis point in ZN. (Again, today, 12/01/08, the value in the box is 5.03). Of course the values will be different as you look at this. But, they won't be that much different. So, I think you can get the idea I'm trying to get across.

Notes

CF = Conversion Factor

MDuration = Modified Macaulay Duration

MDuration & DV01s for Futures are based on proxy issue (CTD)

DV01 Box = Dollar Value of 1 basis point move per Box

USDJPY	93.96	(0.24)

The Morning Email: U.S. Treasuries

Notes:
 Basis = (Cash Decimal - (Futures Decimal * CF))*32
 MDuration for Curve Spreads:
 Longer duration minus shorter duration
 32 = price is quoted in 32nds

What is this? (1):
2yr cash has X% duration of 5yr cash.

Cash Duration Matrix

	2	5	10	30
2	100%	0%		
5	41%	100%		
10	22%	54%	100%	0%
30	10%	26%	47%	100%

What is this? (2):
- 2yr cash has DV01 of X\$.
- Multiply the 2yr DV01 by the percent duration to come up with what the 2yrs DV01 SHOULD be compared to the 5yr.

Cash Matrix [DV01 x Duration]

	2	5	10	30
2	\$185			
5	\$195	\$479		
10	\$197	\$484	\$892	
30	\$196	\$481	\$886	\$1,873

What is this? (3):
- Now you can see the over/under value, based on the DV01, from contract to contract. In this example we are looking at the 2yr compared to the 5yr.

Cash Matrix [DV01 over / (under) valued]

	2	5	10	30
2	\$185			
5	(\$10)	\$479		
10	(\$12)	(\$5)	\$892	
30	(\$11)	(\$2)	\$7	\$1,873

Or you can look at the over/under value as a percentage instead of dollar terms.

Cash Matrix [DV01 over / (under) as %]

	2	5	10	30
2	0.0%			
5	-5.2%	0.0%		
10	-6.3%	-1.1%	0.0%	
30	-5.5%	-0.3%	0.8%	0.0%

Tic for Tic Matrix

<u>5/10</u>	<u>Blu/Gld Pk</u>	<u>Diff</u>
96.9	#VALUE!	#VALUE!

Red pack / Blue pack is a 2/5 proxy
 Red pack / Gold pack is a 2/10 proxy
 Blue pack / Gold pack is a 5/10 proxy

"Swap spreads are essentially a measure of the difference between buying a safe government bond and making a riskier loan to a bank"
 --WSJ

Notes:

- 1) Quoted in US Dollars
- 2) CP = Commercial Paper
- 3) ED Pks are colored for pack identifications. Example, the red pack is a 2-yr proxy and is colored red.
- 4) TSY yield minus ED Pk yield
- 5) Swap divided by 100 + TSY yield gives swap rate in basis points.
- 6) Repo Rt quotes is for overnight General Collateral

	Last	Chng	Term	Asset Type
USDLIBON	0.278	(0.0156)	Overnight	LIBOR

Example, below

Overnight Rates -EXAMPLE

Overnight Rates

A 'normal' lending curve looks like the chart to the left. That is, the Libor should be a bit higher than Fed Funds Effective rate (FFER), and the FFER should be a bit higher than the Repo Rate.

The best time to view this page is on the closing email I send in the afternoon. The Fed Funds effective rate and the repo rate rarely update until after I send the morning email.
